KERRAFRONT**

FREEDOM BEGINS AT HOME

At VOX, we believe that true freedom begins at home, and more than any specific style, the individual needs and lifestyle of the household members count. This is why we inspire, advise and provide comprehensive solutions – collections of furniture, doors, floors, wall systems and elevations all adapted to each other.

THOUGHT-OUT PROJECTS

At VOX, we value harmony between functional and aesthetic product dimension. We know this works best for everyday use. Therefore, when designing our offer, we care about the level of design, and we make every effort to ensure that its utility value is as high as possible.

Kerrafront cladding is a good example of ours philosophy of creating a product. Its designer – Dorota Balewicz best describes the strengths of the collection: „Kerrafront are practical, maintenance-free panels, which thanks to the technology used are environmentally friendly and retain their properties for many years. On the other hand, it is a beautiful design, referring to natural patterns, which will perfectly emphasize the character of the house – exactly the way we dream it. Our home will become the same place we come back to with a smile on the face – the perfect space to rest and pursue your passion.”

THINKING ABOUT NATURE

Taking care of the environment is our common duty – both on an individual and business level. When creating the VOX offer, we analyze the production opportunities on an ongoing basis, and we make every effort to ensure that the carbon footprint that we leave in the ecosystem is as low as possible. Modern technological lines, the use of high-quality raw materials, recipes improved over the years and well-thought-out design of the products themselves allow to maintain their excellent technical parameters and functionality.

Thanks to the technology development at VOX, we constantly improve „environmental" parameters. Even today, depending on the product and its application, the weight of recyclable materials is up to 80% of the total, the lack of the need for maintenance limits the use of e.g. toxic paints, and we have reduced the carbon footprint of our products by 40% compared to traditional technology that uses only synthetic polymers. Importantly, VOX products are safe for health and the environment, because they do not contain harmful substances (e.g. lead or cadmium) and do not release volatile organic compounds.

RECYCLING

Our products are made of thermoplastics, which are fully recyclable. We use recycled materials in production. Depending on the product, the weight of recyclable materials is up to 80% of the total.

DURABILITY

Our products are extremely durable. The lifetime of many is 10 or even 50 years. Thanks resistance to a variety of external factors, their impact on the environment is significantly smaller than products with more frequent replacement causing additional wear raw materials, energy and waste generation.

MAINTENANCE

There is no need for maintenance over the entire lifetime, and therefore no additional chemicals (paints, preservatives, etc.) must be used, which means no harm to the environment.

INSULATION

Kerrafront claddings ensure proper ventilation of the facade and protect it against moisture. Additionally, they are an excellent cladding in the system of ventilated facades, which improves efficiency of heat of the building and reduces the need to burn fuels for heating purposes.

HEALTH

Our products are safe for health. They do not contain harmful substances (e.g. lead or cadmium) and do not release volatile organic compounds.

CARBON FOOTPRINT

Our plastics contain mineral fillers and additives derived from renewable raw materials, which reduces the carbon footprint of up to 40% compared to products made only of synthetic polymers.

Wood Effect, Alpine Oak, fourfold board FS-304

KERRAFRONT. CLADDING FOR LIFE

Kerrafront is a facade cladding, which, once installed, does not require any maintenance during use. Thanks to the innovative technology used, Kerrafront is extremely durable and resistant to changing weather conditions. It protects the interior of the building and prevents heat loss. It also provides good air circulation, thus preventing the formation of mould and fungus. Thanks to its elasticity, low weight and simple joining, its installation is quick and easy. It is 100% water resistant and the cut edges do not require any additional protection. Kerrafront is divided into 7 collections among which we can choose from over thirty different colours.

YOUR BEST CHOICE.

KERRAFRONT ADVANTAGES

Kerrafront cladding is a product with a number of unique features that distinguish it from the wide and diverse range of facade cladding. This comes from the unique combination of eye-catching aesthetics, technical parameters and exceptional performance features.

SAVING TIME AND MONEY DURING INSTALLATION:

- Easy and quick installation thanks to the low weight of the panels, wide coverage area, built-in locks and pre-cut mounting holes
- Material easy to work with – not susceptible to unsightly chips and cracks during shipment and installation
- Cut ends do not absorb water and after installation do not require any additional protection eg painting

NO MAINTENANCE REQUIRED:

- Virtually maintenance-free – no need for painting and other treatment
- Absolutely moisture resistant – does not absorb water and is not susceptible to freeze / thaw complications.
- Does not support bacterial or fungal growth

VOX QUALITY:

- Application of Kerracore technology in the production, which results in outstanding uniformity and density of the cellular core of the product. As a result boards feature dimensional stability and durability
- Matt surface of boards
- Connector – free joining with Connex System

Modern Wood, Quartz Grey, double board FS-302

DESIGN AND TECHNOLOGY

KERRACORE TECHNOLOGY

The Kerrafront cladding owes its unique properties to a well-thought-out structure. Thanks to the Kerracore technology, the panels are extremely durable: the core of foamed polymer makes the product very large mechanical strength. On the other hand, the hard polymer top layer makes it scratch and impact resistant, while being a carrier of texture and durable color.

COLOURS

The variety of patterns in Kerrafront collections is another great advantage of these claddings. The offer includes three categories of decors:

Unicolor decors – thirteen universal colours – from subtle shades of cream and beige to darker colours for a stronger effect.

Wood-like decors – they are deceptively similar to natural wood, reproducing the nuances found in nature.

Modern decors – inspired by modern materials used in construction – stone and minerals, available in a version with a natural stone pattern or in an unicolor version.

TEXTURES

Kerrafront panels are available in five variants of textures that complement the offered colours. This combination allows you to achieve the desired design effect – from wooden, natural patterns to modern finishes.

Delicate wood – a shallow wood texture, drawing of large wood grains

Sharp wood – deep, clearly perceptible wood texture, dense grain pattern

Modern wood – clearly perceptible wood texture, dense grain pattern

Brushed wood – delicately felt texture of brushed wood, natural grain pattern

Concrete – reflects the natural, granular structure of concrete

PERFECT FOR MOBILE CONSTRUCTION

Kerrafront is a product with a very universal application: it is perfect for single-family housing, terraced and mobile construction. Kerrafront claddings are aesthetic, easy to install and use. The light and easy-to-process panels are an excellent cover for building insulation and ensure proper ventilation of the walls. These advantages appreciate our partners from the mobile construction industry.

WOOD-LIKE DECORS

The timeless and noble appearance of wood appreciate both traditionalists and followers of more modern designs. We decided to enrich its aesthetic features with functional values, inaccessible to the natural raw material. This is how we create the collections of VOX wood-like panels. They reflect the appearance and beauty of a noble material, complementing them with advantages that we will appreciate in everyday life, such as no need for periodic maintenance.

Wood Effect, Malt Oak, single board FS-201

WOOD EFFECT IN THE HARMONY WITH NATURE

Timelessness is a feature that distinguishes the Wood Effect collection. It uses wood patterns in an interesting range of colors, and the use of modern technology has resulted in a unique, aesthetically and functionally, cladding.

Its production uses high-quality foil resistant to external factors, which guarantees long-term, trouble-free use. The collection is enriched with color-matched finishing trims.

RUSTIC IDYLIC STYLE WITH A MODERN TWIST

The facade in muted colours, reminiscent of traditional buildings – this is the effect we can achieve with the Rustic collection. The boards from this series offer wide design possibilities – their structure refers to old, unpolished wood, which perfectly reflects the idyllic, cosy style. The Rustic collection is perfect for projects that refer to the style of country houses and barns, they will also look great on contemporary holiday homes.

UNICOLOUR DECORS

Classic colours combined with the structure of wood? The Modern Wood, Classic and Retro collections will be the best choice for those who appreciate elegant simplicity in design. Matt, uniform colour planks come in a carefully selected palette of decors, which includes both subtle, pastel shades and more saturated, darker colours.

Modern Wood, Claystone, double board FS-302

MODERN WOOD SIMPLICITY AND MODERNITY

Modern Wood is a cladding that perfectly combines natural design with functionality typical of modern technological solutions. Its aesthetics refer to modern wooden facades, but it retains the advantages of foamed technology, i.e., it is resistant to moisture, impacts and requires no maintenance. Modern Wood panels have a matte finish and come in seven colours – from natural, warm tones to various shades of grey.

CLASSIC ALWAYS IN STYLE

The Classic collection will fit well both with buildings with a traditional appearance, and those with a more modern shape and structure. It consists of nine universal colours – from light beige, through grey and brown to anthracite. The boards have a wood texture and a matte surface, thanks to which the facade will charm with its beautiful appearance for many years.

RETRO NATURALLY REFINED

Retro is a collection of boards with a deep raw wood texture. The cladding has visible vertical saw marks, which gives a natural effect on the facade. The collection is ideal for houses adjacent to nature, which are an oasis of rest. Users will appreciate the durability, beauty and maintenance-free nature of this solution.

MODERN DECORS

Simple and sparing forms need an appropriate finish. The Trend collection includes boards inspired by stones and minerals, which will be great for modern shapes and will be appreciated by supporters of modern design.

Trend, Anthracite, single board FS-301

TREND BEAUTIFUL SIMPLICITY

The Trend collection is inspired by stone and minerals. It comes in two variants: Stone – with a natural stone pattern and Soft – with a subtle, one-color shade. Thanks to the shape of the boards, it is possible to create a flat facade surface, and the freedom of vertical and horizontal installation allows it to be combined with other materials.

KERRAFRONT SYSTEM BOARDS, PROFILES AND ACCESSORIES

Kerrafront cladding is a complete, functional and well-thought-out offer. Five types of panels, made in the modern Kerracore technology, complete the system of profiles and accessories adapted to all possible installation configurations.

KERRACORE TECHNOLOGY

1 SURFACE LAYER (HARD PVC)

Made with polymers hardened during the technical treatment process. Shock- and scratch-resistant, it holds the colour and the unique structure resembling natural wood.

The method of finishing the top layer of panels varies depending on the collection and decors:

- By adding a dye to the surface layer in the case of all colours uniform.
- By adding a few dyes to the top layer in Wood Design colours.
- Through the use of foils in Wood Effect colours.

2 CORE (FOAM PVC)

Made with a specially-selected mix of minerals and polymers. Characterised by uniformity and a low density which results in the product being very resistant to mechanical damage.

PROFILES AND ACCESSORIES

All profiles and accessories are available in colors matching the panel decors.

The trims for the Wood Effect collection are available in the same foils as the panels. The exception is the universal corner (FS-222), where the foil covers its outer part, while the inner one is in a matching uniform colour.

Trims for panels from the Rustic collection have a structure.

Joint covers are available only in uniform colours and do not apply to panels from the Wood Effect and Rustic collections.

METHODS OF JOINING THE PANELS

There are three methods of joining the panels in the Kerrafront System, all are simple and intuitive.

1 JOINING USING THE CONNEX SYSTEM

The Connex System is available for panels with a length of 2.95 m. They are connected by built-in locks and no additional accessories are required. It is almost invisible. The offer already includes FS-304 panels in the new Connex II (Click&Push) System, where the improved construction of the locks ensures even better and a more permanent connection. Due to the unique solution, the Connex II (Click&Push) system is a registered industrial design.
